

Purpose-Built Production Facilities

125,000 square feet of production space dedicated to assembling and fabricating high-performance compression and process packages.

Our facilities were strategically designed by skilled and experienced Compass experts to meet our customers' demands for custom and standard, large and small HP compressor packages and process systems. Our most recently-built, 80,000 square foot facility, is world-class and enables us to build compression and process modules with optimal efficiency.

Single-source solution

The facilities maximize efficiency, and include design, fabrication, assembly, sandblast and paint bays that enable us to seamlessly provide our clients with single-source solutions.

Our single-source approach improves the integration of compression and process equipment resulting in superior quality control, reliability, and decreased costs for our customers.

Facility details

- Fully-integrated ERP system
- Real-time information communication system in each bay
- Sixteen bays with one door per bay at 26' wide x 28' high
- Six bays are equipped with mullion doors providing three, 52' wide x 28' high openings
- Utilities located in each bay
- 6 x 25 ton cranes and 3 x 30 ton cranes
- Complete in-house pipe, vessel and skid fabrication
- Indoor paint and blast booths that emit zero dust and reduce waste
- Indoor paint booth size: 62' long x 30' wide x 20' high
- Indoor blast booth size: 60' long x 30' wide x 20' high

With our Retrofit, Rentals and Parts + Service Divisions supporting our packages, we are committed to providing our customers with expert solutions and exceptional experiences through all stages of a project.
