

Compression Package Rentals

Quick delivery of optimized, and custom-modified, stock rental equipment.

Our fleet of stock equipment and quick-delivery standard units are available on a rental or rent-to-purchase basis. With our in-house expertise, we're able to quickly modify the equipment to meet the demands of your business.

Renting provides you with the opportunity to exchange your equipment over the life of your projects in order to boost production and decrease operating costs. Purchase options are available with short- or long-term contracts.

Renting gives our customers flexibility, reduces risk and saves time.

If customers prove-out the field, or the well and the fit is correct, they often buy out the unit. If the fit isn't correct, our customers simply rent another unit that more closely fits their requirements. Renting helps our customers gain control over some of the unknowns and helps manage their risks.

Our rental fleet includes:

- Reciprocating compressor packages
- Rotary screw compressor packages
- Vapor recovery units
- Electric or gas driven units
- Horizontal separator/blowcase packages
- Sweet or sour gas designs

Renting with Compass includes:

- Full engineering and technical support, from performance runs to troubleshooting
- 24/7 response and an extensive critical parts inventory to minimize downtime
- Full unit warranty
- Custom financing options
- Optional preventative maintenance program that complements compressor package rentals. This program includes:
 - › All preventative and corrective maintenance
 - › Field service calls
 - › Equipment overhauls
 - › Cost of rental return

We offer quick response times through our strategically located service branches, overhaul shops and parts warehouses, decreasing your downtime and operating costs. We are committed to providing our customers with expert solutions and exceptional experiences through all stages of a project.
