

Compass Corporate Overview

Leading Provider of Top-Quality Compression and Process Packages

Compass is a privately-owned company, established in 2001. The Company is led by an Executive Team consisting of five well-recognized industry experts, with deep experience in the natural gas compression and process industry:

- **John Forgeron**, President
- **Phil Ness**, Vice President, Operations
- **Scott Douglas**, Vice President, Sales
- **Bill Moore**, Chief Operating Officer
- **Doug Eger**, Chief Financial Officer

Compass specializes in designing and fabricating top-quality, warm-weather and arctic-style, reciprocating, rotary screw and rotary vane compressor packages and process package systems for the energy industry, worldwide.

Over the last 20+ years, our industry-renowned executive team has successfully steered Compass through the highs and lows of the industry and has made many bold and strategic moves to ensure the continued success and growth of our company. This includes evolving the business from the singularly focused Compass Compression to Compass, a diverse company that offers five integrated and complementary business divisions.

In 2020, Compass made an industry-changing move by acquiring Exterran Corporation's US compression assets which significantly increased our US footprint and our ability to provide top-quality compression and process equipment to clients around the world.

Our five business divisions enable us to design, fabricate, optimize, rent/lease, and support the life of our clients' equipment:

1. **Compression** – We offer a diverse and broad product range of standard, configurable and customizable, warm-weather and arctic-style, reciprocating, rotary screw and rotary vane compressor packages.
2. **Process** – Our packaged process equipment ranges from small, independent, skid-mounted modules to large, integrated, multi-skid processing systems.
3. **Retrofit** – Our dedicated retrofit team provides solutions that increase equipment operating efficiencies, horsepower utilization and operational flexibility.
4. **Rentals** – Our fleet of well-maintained stock equipment and quick-delivery standard units, is available on a rental, or rent-to-purchase basis.
5. **Parts + Service** – We offer a robust parts supply. Our OEM-trained and experienced field technicians are available around the clock, and are located throughout western Canada and the northwestern United States.

400,000 Square Feet of World-Class Facilities

We have 400,000 square feet of purpose-built fabricating and packaging facilities, including our Brittmoore Road Facility in Houston, TX and our Frontier Facility in Calgary, AB. These state-of-the-art facilities include design, fabrication, assembly, sand blast and paint bays enabling us to seamlessly provide our clients with fully complete solutions.
