

Purpose-Built Production Facilities in US and Canada

400,000 square feet of production space

Our state-of-the-art facilities, including our Brittmoore Road Facility in Houston, TX and our Frontier Facility in Calgary, AB are dedicated to assembling and fabricating high-performance compression and process packages.

Our facilities were strategically designed by skilled and experienced compression and process package experts to meet our clients' demands for standard, configurable and custom-engineered compressor packages and process systems.

We design and fabricate standard and custom compressor packages in both our Brittmoore and Frontier Facilities, with our Brittmoore team specializing in warm-weather packages, and our Frontier team specializing in Arctic-style packages, as well as designing and fabricating process equipment solutions.

Please see the reverse side for more details on each facility.

Single-Source Solution

Our world-class facilities maximize efficiency and include design, fabrication, assembly, sand blast bays and paint bays, that enable us to provide clients with single-source solutions. Our single-source approach improves the integration of compression and process equipment resulting in superior quality control, reliability and decreased costs for our clients.

For large or small-scale compression projects, Compass is your single source for expert, reliable, consistent, cost-effective and timely compression solutions.

Compass Commitment

With our Retrofit, Rentals and Parts + Service divisions supporting our packages, we are committed to providing our customers with expert solutions and exceptional experiences through all stages of a project.
